## BB 4013 Ball Screw Press Brake

**Ball screw drive mechanism**

The back gauge can be used ranging the full length of a machine due to its wide space, thereby step bending can be effectively performed.

|                |                                                  |
|----------------|--------------------------------------------------|
| Press Force    | 36 Ton (353kN)                                   |
| Bending length | 1260mm                                           |
| Run speed      | Approach 100mm/s, Bending 20mm/s, Return 100mm/s |
| Weight         | 3.5 ton                                          |
